

Dräger Panorama Nova® Full Face Mask

The Panorama Nova® full face mask has been successful in the market worldwide for decades and provides reliable and secure protection. In combination with a compressed air breathing apparatus or re-breather, it is used as a tried and tested face piece by firefighters and in mining.

SF-465-2000

Benefits

Comfortable fit combined with double sealing line

Features a double sealing line for maximum safety which adapts well to different head and face shapes

Many different uses

With the different connection piece options, the Panorama Nova® can be used as a standard or an overpressure mask for filters, compressed air breathing apparatus, airline systems, as well re-breathers for firefighters, mining, or in industrial applications.

Robust and durable

For decades the mask has fared well in any extreme or rough condition in which the different target groups and user groups (industry, firefighters and mining) operate.

System integration

With the option to choose a mask with different connections and wearing systems, as straps or helmet adapters, it will fit perfectly into the system, consisting of helmet, mask, and respiratory system (compressed-air breathing apparatus, closed-circuit breathing apparatus or filter).

System Components

Dräger MS-COM

The Dräger MS-COM, alternatively with swan neck microphone or with microphone positioned under the cap, can be combined with the Dräger Panorama Nova® via an additional adapter.

System Components

Dräger PSS® BG 4 plus

Specially designed for demanding tasks, The Dräger PSS® BG4 plus closed-circuit breathing apparatus combines uncompromising safety with outstanding respiratory protection and wearer comfort. Innovative in design, it provides the wearer with up to four hours of breathing air in toxic environments.

Accessories

Protex mask bag

Instead of a carrying box, the Dräger Panorama Nova® can be stored in the "Protex" mask bag.
